---

I am forwarding this voicemail message from my personal device to my official EPA email box.

I am also cc'ing my EPA colleague on this transmittal, of the attached voicemail from (b) (6) (b) (6) of Whidbey Island Wa. regarding the EPA R-10 proposed MS4 permit for the Navy Air Station Whidbey Island

Explanation- My work phone is forwarded to my personal cell when i am away from my desk / teleworking.

On Monday 11/18/19, I was speaking with another caller on my EPA land line this morning when the attached call came in- in my haste i somehow ended up pushing a button ( or something) that erroneously allowed this VM to be inadvertently recorded on my personal cell phone voicemail box

-

This does not normally happen in the EC 500 system and I regret the error.

Misha Vakoc  
EPA Region 10

Ah yes, my name is (b) (6), ah, that's (b) (6) Last name (b) (6), (b) (6), ah I live at (b) (6). Ah, by your action, your specific action as the EPA representative, ah you have now just made it to where the Navy is allowed to pollute and have no recourse. Ah, uh, we, as I said, uh, this is very disconcerting, as to the fact that we have our farm, that now you have just allowed the Navy to completely pollute it. So...With that with that understanding we want to know what compensation that you are going to do as Washington State and the federal government as the EPA what you are going to do to compensate us for your harm that you are now going to allow.
